

Healthcare Facilities Symposium & Expo
Navy Pier
Chicago, IL
October 2-4, 2007

This year's Symposium show on Navy Pier was a major attraction to the healthcare design and engineering community as the show attracted more attendees and exhibitors than ever before. A main attraction at the show was a patient mock-up room demo which featured the new product collaboration between ALS and The Sky Factory. The product, Duet, is a combination Sky Ceiling and Harmony Ambient/Exam recessed patient lights. Both products are specially mounted to provide maximum patient ease and comfort, and effective clinical illumination.

Caption: Alana Neil and Kristin Henriksen of Archibald & Meek, our Chicago agency, helped staff the ALS booth.
